**health checkup
for free.**

Lifestyle-related disease checkup

Cancer screenings

Checkup period April 1, 2026 ▶ March 31, 2027

Fujitsu Health Insurance Society

3 reasons

for recommending a health checkup

Reason

1

Anyone can get sick.

Anyone can develop lifestyle-related diseases like cancer. You may be young and not have any subjective symptoms, but it does not mean you are safe.

Reason

2

Health checkup leads to early detection.

Simple tests available at a medical institution near you enable early detection.

If you are instructed to get a full examination due to the screening result, please make sure to take it at a medical institution.

* Bring proof of your health insurance eligibility for the full examination.

* Health checkup allows early detection of risks such as cancer risks but does not guarantee 100% disease detection. If you feel something is wrong or notice some symptoms, please arrange a consultation at a medical institution immediately.

Reason

3

Early detection can lead to an 90% cure rate.

Over 90% of cancer patients can be cured through early detection. This saves on treatment time and costs while minimizing disruption to daily life.

* Stomach cancer, colorectal cancer, breast cancer, and cervical cancer have a cure rate of over 90%, while lung cancer has a cure rate of over 83%.

The term "cure" means a 5-year relative survival rate from the time of diagnosis.

The relative survival rate is the survival rate exclusive of deaths by cancer.

Source: National Cancer Center Cancer Information Service "Cancer Records & Statistics 2025"

It is an important health checkup that saves lives.

Please take this opportunity to take it.

For a healthy life Health Check Road Map

Check your health level.

You hardly notice symptoms of lifestyle-related diseases. They are scary diseases because they develop without your knowledge, damage your blood vessels, heart, brain, and other organs, and cause cardiac or cerebral infarction. Get a health checkup, know your health level, and improve your lifestyle!

Level. 1
You are healthy.

Even though the health checkup did not detect any problems, **continue to improve your health!**

Review your lifestyle while you can.

Level. 2
You are at risk for lifestyle-related diseases.

- Lack of exercise
- Unhealthy diet
- Smoking/excessive drinking
- Excessive stress

Level. 3
You have developed lifestyle-related diseases.

Visit a medical institution soon!

- Obesity
- Diabetes
- Hypertension
- Hyperlipidemia

Level. 4
You have developed complications.

- Cardiac infarction, angina, etc.
- Brain hemorrhage, cerebral infarction, etc.
- Diabetes complications (blindness, artificial dialysis, etc.)

Level. 5
You need nursing care.

- Hemiplegia
- Dementia
- Inconvenience in daily life

I cannot move my body without help...

Danger zone

Finally...

Fujitsu Health Insurance

The lifestyle-related disease screening covers the **five major cancers!**

Colon cancer

You take a stool sample at home and submit it to a medical institution.

Stomach cancer

You drink barium and have stomach X-ray photos taken. Takes 10 minutes or so.

Lung cancer

X-ray photos of the breast area are taken. Takes 5 minutes or so.

Cervical cancer

The physician uses a special brush to rub the entrance of the uterus and sample tissues.

Breast cancer

Mammography

A breast placed on a plate is compressed to take X-ray photos from different angles.

Breast ultrasound

A transducer is moved on the skin of the breast to get an image of the inside.

Maintain a healthy lifestyle and **get a health checkup every year!**

Important
note

You can choose how to receive a health checkup.

Option
A

Receive a checkup at a contracted health center (All Members)

1 Choose where to receive a checkup.

Choose a health center from the **List of Contracted Health Centers**.

This is a health checkup performed by a health center contracted by Fujitsu Health Insurance.

2 Make a reservation.

Call the venue and make a reservation. Please make sure to mention that it will be a free checkup provided by the Fujitsu Health Insurance Society.

3 Receive a checkup.

Complete the Health Checkup Request Form in advance and bring it with the items specified by the Health Center.

Option
B

Fujitsu Clinic Examination (Those 40 and Up)

This is a health checkup performed at Fujitsu Clinic in JR Nambu Line Musashi-Nakahara Station, Nakahara Ward, Kawasaki City

Appointment
by Email

Please send it to Fujitsu Clinic either by **email** with the support of a Japanese-speaking person.

What you need
for the checkup

Make sure to bring one of My Number Health Insurance Card, or Health Insurance Eligibility Certificate to the checkup and stool/urine samples.

※There are also other ways to apply for the subsidy after receiving full payment at the nearest medical institution. Please send it to Health Checkup Contact Center by email.

Note: You can also receive cancer screenings offered by your local municipality.
